Drs Eduardo D. Bruera and Russell K. Portenoy have completely revised and updated the widely respected Cancer Pain: Assessment and Management for the second edition of this unanimously praised book. This is a comprehensive, clinically oriented review of all aspects of the complex and multidimensional problem of cancer pain. The unique characteristics of cancer pain, including pathophysiology, clinical assessment, diagnosis, and pharmacological and nonpharmacological management are all discussed here in detail. Internationally recognized leaders in cancer pain research have contributed to many new chapters, including neuraxial analgesia, hospice and institution-based palliative care programs, bone pain, and cancer pain and palliative care in the developing world. Cancer

Pain continues to be a scholarly but accessible text that is an essential resource for physicians, nurses, and medical students who treat suffering from cancer pain.

Haunting, gripping, and psychologically fierce tales that illuminate an unsettling side of humanity from “one of the treasures of American story writing” (Jonathan Lethem). Featuring the O. Henry Prize-winning short story “Windeye,” this collection of Brian Evenson’s masterful stories “involve impossible scenarios and alternative realities” that are “always surprising” (Bookforum). A woman falling out of sync with the world; a king’s servant hypnotized by his murderous horse; a transplanted ear with a mind of its own—the characters in these twenty-five stories live as interlopers in a world shaped by mysterious disappearances and unfathomable discrepancies between the real and imagined, revealing the breadth and depth of Evenson’s uncanny vision.

This book offers a simple overview of how children can make music. Easy-to-read text, labeled photos, and a picture glossary make this book the perfect introduction to the topic.

Dramatic advances in acute fracture care, as well as contemporary issues involving the delivery, reimbursement, and evaluation of trauma care make the publication of this 3rd edition of OKU Trauma timely and necessary. The authors have chosen to enhance the exclusively anatomic organization of previous editions by creating three entirely new sections that address special trauma considerations, the delivery and assessment of fracture care, and managing the sequelae of acute injury.

Autoimmunity refers to the immune responses of an organism against its healthy cells and tissues. Whenever a human body exhibits an abnormal immune response to a normal body part, the condition may be termed as an autoimmune disease. The immune response can be targeted at any body part. Some of its common symptoms are recurring tiredness and low-grade fever. While some autoimmune diseases are triggered by environmental factors or infections, some are genetic. Common examples of autoimmune diseases are alopecia areata, Graves' disease, celiac disease, inflammatory bowel disease, systemic lupus erythematosus, etc. The treatment of these generally includes management of the symptoms rather than absolute cure of the disease. This book provides comprehensive insights into autoimmunity and autoimmune diseases. It discusses the fundamentals as well as modern approaches in the treatment of these disorders. It will serve as a valuable source of reference for graduate and postgraduate students alike.

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. The Age of Enlightenment profoundly enriched religious and philosophical understanding and continues to influence present-day thinking. Works collected here include masterpieces by David Hume, Immanuel Kant, and Jean-Jacques Rousseau, as well as religious sermons and moral debates on the issues of the day, such as the slave
